Hyderabad, India

PROFESSIONAL SUMMARY

Aspiring Software Developer with strong foundations in Python, JavaScript, SQL, OOPs, and SDLC concepts. Hands-on experience in building backend applications, AI-driven systems, and real-time dashboards with strong problem-solving, debugging, teamwork, and continuous learning mindset.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, Java (Basics), C/C++
- **Web Technologies:** HTML, CSS, JavaScript, React (Basics)
- **Backend & Databases:** Flask, Node.js basics, SQLite, MySQL, MongoDB basics
- **Core CS:** OOPs, SDLC, Debugging, REST APIs, Git/GitHub
- **Core Strengths:** Problem Solving, Team Collaboration, Code Reviews, Documentation

EDUCATION

- **B.Tech in Cyber Security | Malla Reddy Engineering College | 2025**

PROJECT EXPERIENCE

AI-Based Traffic Sign Text Detection and Recognition System

- Built a Computer Vision and NLP-based traffic sign recognition system using YOLOv5s, MSER, OCR, and Hamming-distance-based text correction.
- Designed a multi-stage preprocessing pipeline with FFT-IFFT enhancement and LUV luminance processing for robust text extraction in adverse weather conditions.
- Evaluated the system on multi-dataset road sign images, achieving 96%+ F1 score in text detection and recognition.
- Enabled real-time traffic sign understanding for ADAS, autonomous driving, and intelligent transportation systems.

SIEM Dashboard | Flask, Python, SQLite, Chart.js

- Built a real-time SIEM dashboard for centralized security log monitoring and threat detection.
- Developed Python-Flask log ingestion pipelines for syslog, authentication, and firewall events.
- Implemented rule-based attack detection for brute-force attempts and suspicious IP activity.
- Created interactive dashboards using Chart.js and SQLite for alerts, filtering, and log search.

ADDITIONAL SKILLS

- Strong analytical and independent problem-solving skills
- Effective communication and teamwork abilities
- Quick learner with passion for new technologies
